CIR. NO.: 04/CMPS/2026-27 06 June 2026

Why AI & Robotics for Students?

Dear Parents,

The world is changing rapidly with the growth of Artificial Intelligence (AI), Robotics, and Automation. These technologies are becoming part of almost every industry, including healthcare, engineering, banking, agriculture, education, and manufacturing.

Learning AI and Robotics will help students to:

- Improve logical thinking and problem-solving skills.
- Understand Science and Mathematics through practical activities.
- Develop creativity, innovation, and teamwork.
- Gain confidence by building real projects and models.
- Learn important technology skills needed for future careers.

Many future jobs will require knowledge of AI, Robotics, and digital technologies. Early exposure helps the student to understand these fields and prepares them for higher studies and career opportunities.

Students who are not familiar with these technologies may find it more difficult to compete in a technology-driven world. Therefore, learning AI and Robotics at an early stage is becoming as important as learning Science and Mathematics.

Our AI and Robotics programme is designed to make learning fun, practical, and future-focused, helping students become confident, creative, and ready for tomorrow's opportunities.

The fee for a student of any class is Rs.150/- for four sessions in a month. Kindly fill in the consent/write a diary note, and send it through your ward to the Class Teacher on Monday, 08 June 2026. A video will be posted about Robotics along with this circular.

For queries, please contact: Mr. Nidhin Gopi - 8891102345

Together, let us prepare our children for the future.

Best wishes!
Principal

CONSENT

I, _____, parent of _____ studying in Class _____ agree to enroll my son/daughter for the Robotic classes. I am sending along the fee of Rs.150/- in the school diary in an envelope.

Name and signature with date of parent: _____
